Armadale is 40 kilometres from the city of Perth. Armadale and Perth Hills are steeped in settler history dating back to the 1820s, but the region has been home to the traditional Noongar landowners for millennia, part of the broader Whadjuk region, often referred to as the South West of Western Australia.

CULTURE AND HISTORY STRETCHING BACK

MILLENNIA From the traditional Noongar land owners – custodians of the region for thousands of years – through to European settlement in 1829, the Perth Hills and Armadale region has a rich history.

Kelmscott (Goolamrup in Noongar) was chosen as a site for a new town by Governor Sir James Stirling just five months after the founding of the Swan River Colony in Western Australia. This makes Kelmscott one WA's oldest towns. From the town's humble beginnings as a barracks, the region grew and prospered as a **timber and agricultural region**, famed for its orchards.

It's a story of hardship and heartache, tenacity and triumph that's defined by the region's beautiful countryside and the meeting of Aboriginal and European cultures. **Explore the story for yourself.**

At its peak in 1928 the vineyard produced 800,000 gallons, but today all that's left of the vineyard are the remnants of its terraces among the houses overlooking Armadale.
