

## Application for Approval of Dust Management Plan

**Local Government Act 1995**  
**Environment, Animals and Nuisance Local Laws 2002**

<b>Description of Proposed Work:</b>			
<b>Total Land Area m<sup>2</sup>:</b>		<b>Maximum Exposed Area m<sup>2</sup>:</b>	
<b>Site Characteristics:</b>	Soil Type	Score from Assessment Chart	

### Site Location Details

<b>No. of Lots</b>	<b>Lot No.</b>	<b>Volume</b>	<b>Folio</b>	<b>WAPC No.</b>
<b>Street &amp; Suburb:</b>		<b>Nearest Road/s:</b>		
<b>Estate Name:</b>		Stage No.		

### Start and Finish Dates

<b>Earthworks:</b>	Start Date	Finish Date
<b>Construction:</b>	Start Date	Finish Date

### Owner/s

<b>Name:</b>		<b>Phone:</b>
<b>Address:</b>		

### Applicant

<b>Name:</b>		<b>Phone:</b>
<b>Mail Address:</b>		Postcode
<b>Email:</b>		

#### Contractor

<b>Name:</b>		<b>Phone:</b>	
<b>Mail Address:</b>			<b>Postcode</b>

#### Supervisor

<b>Name:</b>		<b>Phone:</b>	
<b>Email:</b>			

Required Measures	Commitment (provide details)
<b>Before You Start</b> Prior to starting work on the site, notify nearby residents likely to be affected by dust and provide them with contact details to respond to complaints.	
<b>Timing of Earthworks</b> Schedule work on the development site during times of the year when potential to create dust is kept to a minimum. For sites with a classification of 3 and 4, avoid bulk earthworks in summer months when strong winds and dry conditions prevail.	
<b>Staging of Earthworks</b> Retain existing vegetation as long as possible. This can be achieved by minimizing exposed areas or staging earthworks so that dust can be controlled.	
<b>Stabilisation of Exposed Areas</b> Stabilise all exposed land to prevent dust lift off causing a nuisance. This can be achieved by one or a combination of the following: <ul style="list-style-type: none"> <li>Water Use - availability of suitable water carts is required at all times for site with a classification of 2, 3 or 4. Where there is sufficient water pressure, sprinklers may also be used to wet exposed areas during periods of high wind</li> </ul>	

<ul style="list-style-type: none"> <li>◦ Hydro mulch - to prevent dust lift off where bulk earthworks have been completed and little or no further activity will take place in the short term.</li> <li>◦ Chipped vegetation - using material produced on site</li> <li>◦ Chemical Stabilisation - including bitumen, inorganic salt and adhesive based materials.</li> </ul>	
<p><b>Storage of Materials on Site</b></p> <p>Loose materials left on site must be stored in a manner that prevents loose materials from wind effects and other prevailing weather elements.</p>	
<p><b>Stop Work</b></p> <p>Stop work immediately whenever high dust causing activities are likely to cause a dust nuisance to nearby properties.</p>	
<p><b>Make Good Damage Caused by Escape of Dust</b></p> <p>Make good any damage to neighbouring properties resulting from release of dust from the development site.</p>	

I \_\_\_\_\_ have due authorisation and delegation to sign this Air Quality - Dust Management Plan on behalf of the Company listed above and take responsibility for ensuring compliance with our commitment specified herein, the City's Local Laws and any other relevant legislation.

Signature: \_\_\_\_\_
