

The MyPestGuide™ website and MPG Reporter app can be used to report your trap's location and any suspect wasps. It can also be employed to help identify other unfamiliar insects, pests or diseases.

If you have adopted a surveillance trap, please follow these three steps:

1. Bait & hang it, 2. Map it, 3. Report it.

1. Bait & hang it

Bait with an ice-cube sized piece of non-oily fish every 1-2 weeks (December to May).

Hang in an easy to reach position in a shady tree where you walk past regularly.

2. Map it

Photograph your trap and record the location of your trap using the **MPG Reporter app** or the MPG website mypestguide.agric.wa.gov.au

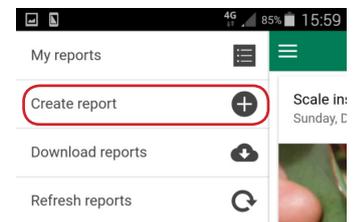

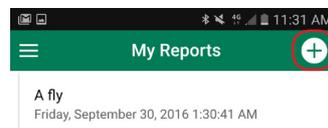

or

MPG Reporter app:

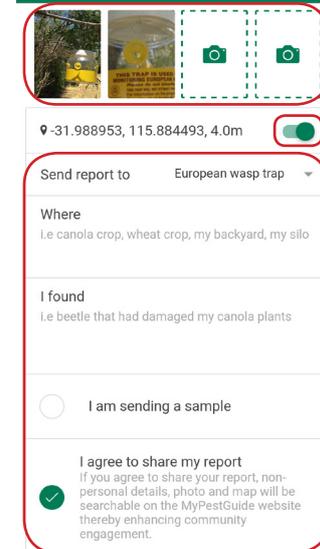

a) Open the app on your mobile device.

b) Create a report by selecting the '+' symbol or the 'menu' button on your screen.

c) Take or attach up to four photos.

d) Turn on 'location'.

e) Select 'European wasp trap' from the drop-down box and complete relevant details.

f) Tick 'share my report'.

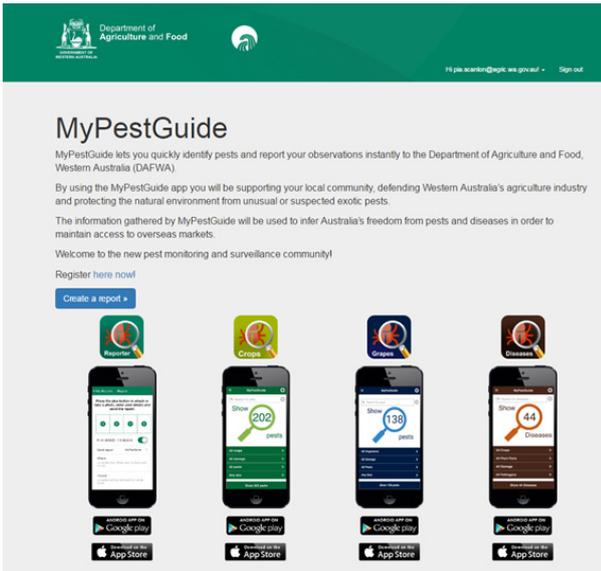

g) Click 'send'!

Any reports you make using the app will be stored within the app for reference along with our response.

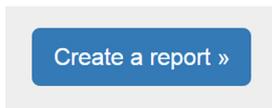

MPG website:

a) Go to mypestguide.agric.wa.gov.au and follow the instructions below.

b) Click on the 'Create a report' button.

c) Ensure 'physical location' setting is enabled in your browser.

Ensure 'physical location' setting is turned on. Wait for green dot to appear. Select green dot and drag to where the pest was observed.

Latitude:
