

Solar Battery Storage

Friday 28 May, 10.30 - 11.30am at Armadale Library

Come and find out about the latest battery technology, how batteries can predict your usage to adapt, and what the real facts and figures of installing a battery are.

You will learn about:

- ◆ The different types of batteries that are available.
- ◆ What the return on investment times and figures are.
- ◆ How the technology is changing and what is in store for the future.
- ◆ If your current solar system is battery ready.

Craig Donohue had worked in the solar industry for over a decade and he has a passion for sustainability, and reducing our carbon footprint and energy bills.

Craig has presented hundreds of workshops to spread the word about sustainable energy usage for all homeowners in Perth.

Places are limited and bookings are essential. Call 9394 5125 or visit library.armadale.wa.gov.au to book your place.

If you are unable to attend after booking please notify the library.

*This event is brought to you by **Switch your Thinking, Clean NRG Solar and the City of Armadale.***
