## A NEW FIRE DANGER RATING SYSTEM

To improve the fire danger forecasting, and strengthen how fire authorities communicate bushfire danger to improve community safety, a new fire danger rating system will go live across Australia on 1 September 2022.

There will now be a simplified system of four levels with action-oriented messages and feature an 'off' level for days where no proactive action is required.

The Australian Fire Danger Ratings (AFDRS) levels are:

### MODERATE

Plan and prepare

### HIGH

Be ready to act

### EXTREME

Take action now to protect life and property

### CATASTROPHIC

For your survival, leave bushfire risk areas
